

***Schedule 1 to
Articles of Revival (transition)
of the Canadian Boiler Society***

6. Statement of purpose of the corporation

The purposes of the Corporation are:

1. To establish voluntary criteria to promote quality, safety, reliability, and economy which will result in the excellence of all Canadian-built boilers, auxiliary equipment, and services relating thereto.
2. To promote and foster the improvement of the boiler manufacturing and auxiliary equipment industry and to be responsive to the needs of the public and the customers which it serves.
3. To study and develop methods for international trade extension by preparing briefs to the Federal Government on tax relief, duties, import quotas, and any other communication by way of articles, papers, etc. with Government agencies which will promote and assist the Canadian Boiler Industry to increase its export sales.
4. To establish and provide to the members of the Canadian Boiler Society statistical information related to industry activities.
5. To co-operate, actively participate, and provide guidance and input with other organizations and with governmental bodies in matters relating to the industry such as inspection services, boiler codes, operating regulations, environmental regulations, fuel burning equipment regulations, metric conversion, material and workmanship, etc.
6. To encourage and contribute to such research and development as will be responsive to the welfare of the industry.
